

# Electronic lockers

## Make it easy for your customers affordable, easily accessible storage for every need

ELTS electronic lockers are ideal for airport, rail, boat and coach terminals, shops, sports facilities and amusement parks.

Their design enables lockers to be located wherever they are needed. The door design means different sizes can be combined, customised for every requirement.

Our business concept is to provide lockers free of charge and share the revenues.

We bear the cost of the investment, installation, maintenance and replacement parts, at no cost to you. All you need to do is provide the floor area, check that lockers are emptied and account for the revenues to us using predetermined procedures.

It's a simple way to offer your customers a storage service, with no investment costs for you.

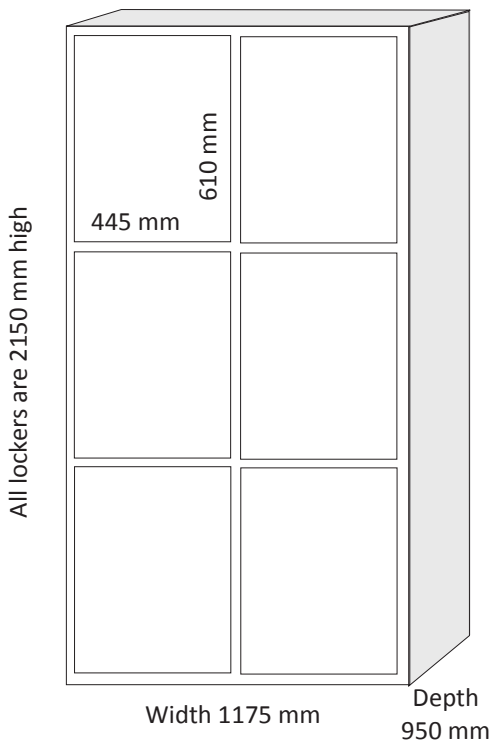

Technical specifications: see next page

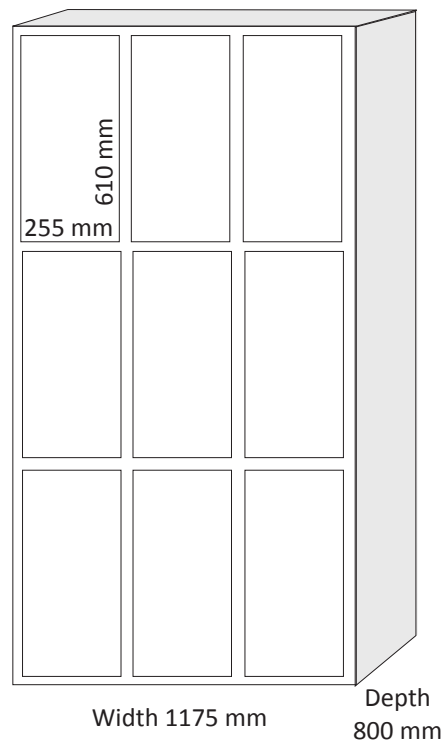

# Technical specification

- Constructed of wear-resistant, specially coated sheet steel to ensure the paint will not flake and to guarantee extended durability.
- The electronic control panel enables us to change the rental period, charges, etc., when required.
- The lockers can be connected to a local PC to make it easier for them to be monitored in a large network.
- Door dimensions: 25x45, 25x60, 45x60 cm
- Available in standard ELTS colours or finished in your colour.
- Up to six different coins can be used, including tokens.
- Locked with a key.
