

**The market
leader with long
experience
in lockers**

now with a new name

A stylized illustration in the bottom right corner. It features a brown suitcase with a white handle and a white keyhole. A large, white key is positioned vertically, with its head at the top and its teeth pointing downwards. The key is partially overlapping the suitcase and the letters 'ELTS'.

ELTS

European Locker and Travel Service

Innovation backed by bags of knowledge

Our 60-year tradition has given us great expertise in luggage lockers. Now we are taking all our experience into the future.

In Europe, we are now changing our name to European Locker and Travel Service, abbreviated to ELTS, but we are retaining our knowledgeable staff and our well-proven concept. All our expertise and experience is at your disposal to help you with storage for your customers' bags and shopping.

ELTS currently operates in the Nordic region and Spain, with service engineers and sales people near you.

Market leader

Our long experience means we lead the market in expertise in lockers. We know your end customers' requirements, and we always tailor our storage solutions on the basis of a dialogue with you, our client.

We pay attention to your needs, and work constantly on the development and location of our products.

Our lockers are assembled on our premises by our own staff, which means we have excellent knowledge of our products. If your end customer loses their key, we have a simple system for changing the lock cylinder quickly and easily so your storage solution remains optimal. We also have our own service engineers, who inspect the lockers regularly.

Our strength

As a company, we value knowledge and customer relations most highly. We know how important it is that everything works, and we constantly undertake preventative work to avoid downtime.

Our business concept is to provide left-luggage lockers free of charge and share a percentage of the revenues. We bear the cost of the investment, installation, replacement parts and maintenance, at no cost to you. All you need to do is provide the floor area, check that lockers are emptied and account for the revenues to us using predetermined procedures. Our knowledgeable staff are always at your disposal.

Because we develop the lockers ourselves, we customise them to your requirements and we supply both mechanical and electronic solutions.

The future

There will always be a need to store belongings for shorter or longer periods, but consumers are increasingly demanding card payment solutions and the option to control their own rental periods. We are always at the forefront in meeting consumers' requirements at a reasonable investment cost to you, our customer.

Our dialogue with you about your needs is an ongoing opportunity to grow and create even better and more customised solutions.

We are constantly advancing together into the future.
